

Webinar on Decision Making

On 12 March 2024, the Career Placement Cell of St. Xavier College organized an online programme in collaboration with BSSS Institute of Advanced Studies. The session focused on enhancing decision-making skills among students, an essential aspect of personal and professional development.

The primary objective of the programme was to equip 6th-semester students with the necessary tools and techniques to make effective decisions, thereby empowering them to navigate various challenges in their academic and professional lives successfully. 117 6th-semester students participated in the online programme. (Due to internet connectivity difficulties, 3 to 4 students attended the online session in one device.)

Dr. Pooja Gupta delivered a comprehensive presentation on decision making, covering various aspects such as Understanding the importance of decision making in personal and professional contexts, exploring different decision-making models and techniques, identifying common cognitive biases and how they influence decision making and practical tips for enhancing decision-making skills.

Following the presentation, students were encouraged to participate in a question round, wherein they could seek clarification on any doubts or queries related to decision making. This interactive session provided students with an opportunity to engage with the presenter and deepen their understanding of the subject matter.
