

Programme on Facilitating Agriculture Resilient Measures

On 17th August, 2023, the Development Association of Nagaland (DAN) in collaboration with Xavierite Farmers Club organized a program on facilitating agriculture resilient measures at St. Xavier college. The event aimed to address the pressing issues of agricultural resilience and sustainable farming practices in the face of climate change. The program began at 11:50 am. Lamneithem from 5th semester prayed for the program after which the resource person Mr. Poaminlal introduced different types of medicinal plants and their uses in different ways. Suniya of 5th semester thanked the resource person and the farmers club who came for the program and made it a successful and insightful one. Right after the program the club members along with the resource person actively took part in planting the medicinal plants in the college Biodiversity Garden. It was a fruitful program where the students learned about the importance of the medicinal plants. 14 students took active participation in the program.
